

EBSCO Article Databases

What is EBSCO?

EBSCO is a company known for the hundreds of library databases they offer; the COS Library currently has about fifteen EBSCO databases. EBSCO databases are a great place to look for journal, magazine, and newspaper articles.

Getting Started

1. Go to the Library's home page at: www.siskiyous.edu/library
2. Click on **Articles & Databases**
3. Select a database (see the "Choosing" section below)
4. Click on the database name to open it
5. If you are off-campus, log in with your mySiskiyous username & password
6. Search more than one database at a time if you want (see below)

Choosing an EBSCO Database

Not every database will cover your topic well! Take a minute to choose the ones that are the best matches for your topic. Start by opening one, then use the Choose Databases option to search more than one database at a time.

General databases (cover a wide variety of topics)

Always consider using one or both of our two general databases which cover a wide variety of topics:

- *Academic Search Complete* (has more academic research/scholarly/peer reviewed articles than *MasterFILE*)
- *MasterFILE Premier* (has more articles written for a general audience than *Academic Search*)

Subject Databases

- *America: History & Life*
- *Business Source Elite*
- *Regional Business News*
- *ERIC* (education & teaching)
- *Professional Development Collection* (teaching)
- *MAS Ultra* (articles written for high school age students)
- *Primary Search* (articles written for elementary age kids)
- *Military & Government Collection*
- *Newspaper Source* (local/national news, current events)
- *Psychology & Behavioral Sciences Collection*

Nursing Databases

- *CINAHL Plus*
- *Health Source: Nursing Edition*
- *MEDLINE*

Consumer Health Databases

- *AltHealth Watch* (alternative medicine)
- *AHFS Consumer Medication Information*
- *Health Source: Consumer Edition*

Searching more than one database at a time

You can search more than one EBSCO database at the same time by using the **Choose Databases** link over the search box. Clicking on it brings up a list of all the databases you can search at once. Simply choose the ones you want and click on **OK**.
