

# **2004-05 Annual Report College of the Siskiyous**

*College of the Siskiyous will serve our community and any student who can benefit from an exceptional learning environment which is safe, attractive and promotes a passion for learning, cultural enrichment, and sense of belonging for all.*

## Message from the President

“Graduation Season” has passed and we have completed another year here at the foot of the mountain. This has been a great year for College of the Siskiyous and our students.

Please take a few moments to review the many accomplishments of our students and staff in this report. While there is much left to be done, it is appropriate to take a little time to review the progress we have made during the past year.

During the past year the campus has engaged in an extensive and broad based strategic planning process. As a result of the process we have a new mission statement, statement of institutional values and a function statement. Further, COS now has a 5-year strategic plan that identifies key goals, means to measure successful progress toward attaining those goals and specific activities to move the institution forward in the years to come.

I am extremely proud of the work our staff and students have done to develop this plan for the future of COS. Virtually every employee on campus had the opportunity to be involved in the planning process. This plan will serve as our guide for the next 5 years. We will constantly check our progress against the goals and measures in the plan and will alter the plan when necessary.

Future annual reports will be organized around the goals and values identified in the strategic plan. The current format, however, does a fine job of telling the story of the last year at College of the Siskiyous. Please take a few minutes to review the accomplishments made by our students and staff during 2004-2005.

W. David Pelham, Ed.D.—Superintendent/President  
College of the Siskiyous
