COS Science Majors Moving On

Weed / COS –College of the Siskiyous Science majors, Kelsey Mathwig (right) of Mt. Shasta, Trevor Dooley of Yreka, and Quintilus McDowell of Mt. Shasta will all be transferring to four year universities this fall. Mathwig is transferring to UC, Davis, where she plans to major in Biological Anthropology. Dooley is transferring to Southern Oregon University where he plans to major in Biology and then pursue a career in Ophthalmology. McDowell is transferring to UC Davis where he plans to major in Hydrology. His goal is to establish his own H2O Engineering / Consultant agency in Siskiyou County. Dooley (bottom left) and McDowell (bottom right) are seen pictured here with Dr. William Hirt (bottom center), Instructor of Geology at College of the Siskiyous.

College of the Siskiyous offers a variety of classes for students interested in majoring in Science. The Liberal Arts and Sciences degree prepares students for life in the global community by helping them develop

a core of knowledge, skills, and attitudes essential for personal and professional success. The associate degree in Liberal Arts and Sciences is available in four areas of emphasis: Humanities, Multicultural Studies, Natural Science, and Social Science. In addition, a wide variety of course offerings in Biology and Chemistry are offered including courses that will: prepare students to complete allied health care programs; prepare students to transfer into a bachelor's degree program; and, allow students to get to know their discipline while completing science education requirements.

For more information about our classes, degrees offered, or the many classes offered by our Science Department visit our website at <http://www.siskiyous.edu/instruction>. Registration for the fall semester is open. Classes do and will fill fast! First day of the fall semester is August 27th.
