

The Academic Success Center at College of the Siskiyous offers free peer tutoring for students enrolled in and attending courses that lead to graduation, a certificate or a transfer to a four-year institution. Our peer tutors will reinforce your successful study habits, help you understand difficult aspects of your coursework, and encourage you to learn on your own so you can reach your own educational goals. Our statistics show that students that meet twice a week with a tutor consistently throughout the semester improve their grades. So get started early. Visit the tutoring center office as soon as your next semester starts.
