The Dining Hall menu will now be updated weekly instead of monthly.
- **Information RE: Dangers of secondhand smoke:** Did you know that secondhand smoke is dangerous, even outdoors! The US Surgeon General of the United States concluded that there is no risk-free level of exposure to secondhand tobacco smoke and establishing smoke-free environments is the only proven way to prevent exposure. Also, quitting not only protects your own health but also helps create a safer environment for those around you. With the start of a new year, it's a perfect time to focus on better health by quitting smoking. If you or someone you know is ready to take the first step toward a smoke-free life, free resources and support are available through [Kick It California](#).

## **SJEDI Corner**
